

If We Don't Already Make It, We Will.

Customized Sealing Solutions for Critical Applications.

Need a critical seal? We make critical seals. That's our focus. As engineers, we speak your language and understand your applications. We have a wealth of expertise in sealing designs and materials. So we can advise you on what to do *and* what not to do.

Since 1958, companies around the world have relied on IER's all-rubber, rubber-to-metal, and rubber-to-plastic molding capabilities for critical sealing applications. Today, with the backing of Fujikura's technological resources, we're able to meet an even wider range of requirements for sealing products – from .030" to 40" in diameter.

If you have a new sealing application or if you'd like to reduce costs on an existing application, we can help. For more information, please contact IER Fujikura, Inc.
